ROBLOX “STEAL AN EGG” — COMPLETE AI VISUAL, UI/UX, 3D ASSET & SYSTEMS RECREATION BLUEPRINT

Comprehensive Technical Specification, 7 Orthographic Visual Blueprint Plates, Direct Screenshot/Sprite URLs & Full 213+ Pet/Egg Database (Launch through Update 9: Halloween Dimension)

Target Experience: Steal An Egg on Roblox (Place ID: 107778070777162) | **Creator Group:** and Collect Rare Pets (Owner: Brockodile) | **Genre:** Corridor Steal-and-Hatch Tycoon Simulator

1. Executive System Architecture & Verified Direct Image / Screenshot Index

Launched on July 25, 2026 by the verified Roblox community and Collect Rare Pets (owned by developer **Brockodile**, with core developers `Utily`, `sat_hmd`, and `sat_omr` per BloxInformer’s Steal An Egg Wiki), Steal An Egg (Place ID 107778070777162) is a 7-player server corridor tycoon-simulation experience that reached 9.35 million peak concurrent players during Update 7 (Eggipedia Update Log) and over 8.66 billion lifetime visits (Rolimon’s Game Tracker). Because the game operates on a weekly Saturday 15:00 UTC update cadence, recreating it requires both high-level architectural blueprints and direct access to every verified screenshot, sprite, and 3D render hosted across the official Roblox CDN and community wikis.

Direct Clickable Screenshot, Thumbnail & 3D Sprite URL Catalog

The table below provides verified, direct image URLs and asset galleries from the Roblox CDN, the Steal An Egg Fandom Wiki (555+ uploaded photos), Eggipedia, StealAnEgg.app, BloxInformer, and IGN for direct ingestion into AI vision pipelines.

2. UI/UX Architecture, HUD Layout & Interactive Modal Specifications

To recreate the user interface in Roblox Studio (`StarterGui`), the UI is divided into two distinct layers: the persistent **Active Gameplay HUD** and **Contextual Modal Screens** triggered either by left-sidebar buttons or 3D world `ProximityPrompt` / touch-pad interactions (Eggipedia Beginner's Guide; StealAnEgg.app Shop Intent Router).

Persistent Gameplay HUD & Controls

- **Input Controls (BloxInformer Controls Table):** Movement uses `[W, A, S, D]` (or mobile thumbstick), Jump uses `[Space]`, Hotbar selection uses number keys `[1-9]`, and World Interaction / Melee Swing uses `[E]` or `[Left Mouse Button]`.
- **Top Currency & Speed Counters:** Displays live Total Cash (`$`) with real-time passive income rate (`+$X/s`) and total accumulated Speed. When a player steals an egg in a biome or the Halloween Dimension, a high-contrast central alert banner displays `RUN!` along with a live studs-to-safety counter (Timesaver Halloween Update Guide).
- **Global Event & Night Banners:** Top-center timed banners announce 30-minute server events (*Dr. Scramble's Drones*, *Dr. Scramble's Mecha*, *Rift Overlord*, *Nitro Race*, *Great Bloom*, *Phantom Express*) and night-cycle transformations (*Angels vs. Demons* shift, *Shooting Star Shower*, or the verbatim Halloween banner: *"A Blood Moon has risen! Everything gives x2 Candy Corn!"* per Timesaver).
- **Left Sidebar Navigation:** Features the **Shop** button (Robux limited eggs, `X2 MONEY!` and `X2 GROWTH SPEED!` passes, speed/cash packs) and the blue **Index** button directly below Shop (Eggipedia Index & Bats). Note that *Steal An Egg* has **no Codes button or codes text box** anywhere in its UI (Eggipedia Codes Verification).
- **3D World Billboards & Inventory Pre-Hatch Readouts:** Unhatched eggs in a player's inventory display their exact **Weight in kg** before hatching (which equals the hatched pet's weight), while placed eggs in Base Pens display their remaining countdown timer. Once hatched, the pet's overhead card displays Species Name, Rarity Tier, Weight (kg), Mutation tag(s), and exact `$/s` (Eggipedia Hatch Times).

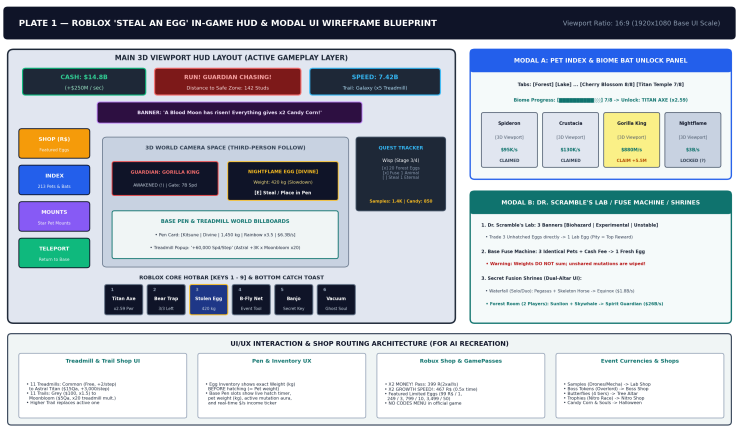

Plate 1: Annotated wireframe specification of the *Steal An Egg* active HUD, 3D world `BillboardGui` tags, 9-slot hotbar, Pet Index modal, and Dr. Scramble's Laboratory / Fusion interfaces.

Interactive Modal Screens & State Rules

Modal / Panel Name	Trigger Location	UI Components, Mechanics & Validation Rules
Pet Index & Bat Unlocks (Source)	Left Sidebar blue `Index` button	Categorized by Biome (13 tabs) + Limited/Event tabs. Newly hatched species glow with a clickable `Claim` button granting a one-time reward of **100× Base Income in Cash** + a fixed **Speed bonus**. Completing all pets in a biome (8/8, or 18 in Angels & Demons) unlocks that biome's melee weapon (Forest Bat up to Titan Axe, Golden Spear, and Leafy Wooden Club).
Base Pen & Capacity Upgrade (Source)	Base Pen Pad / Upgrade Sign	Lets players place stolen eggs into wooden pens to incubate, collect passive cash, sell pets at the Sell Stand, or purchase **Bigger Base (+1 Pet Slot)** upgrades so more pets generate `$/s` simultaneously (Wiki Updates).
Treadmill & Trail Shops (Source)	Base Treadmill & Safe Zone Trail Shop	Treadmill UI lists 11 machines (`Free` to `$15Qa`, `+2` to `+3,000 Speed/Step`). Trail Shop lists 11 trails (`$100` to `$5Qa`, `x1.5` to `x20` treadmill multiplier). Only 1 Trail can be equipped at a time; equipping a higher tier replaces the active trail (Wiki Trail).
Base Fuse Machine (Source)	Left of starting area in Base	Accepts **3 identical pets** of the same species + a scaling Cash fee (e.g., `$310K` for Walrus, `$2.5T` for Oni Tiger, `$114M` observed for 3 Scorpions) with zero cooldown. Destroys the 3 pets and outputs 1 unhatched egg of that species. **Critical rule:** Weights do NOT add up (e.g., 457+256+247 kg Scorpions rolled an 86 kg Scorpion), and unshared mutations are lost (Timesaver).
Dr. Scramble's Laboratory (Source)	Near Player Base (replaced Lobby Rift in Update 6)	Rotates across 3 banners (**Biohazard**, **Experimental**, **Unstable DNA**). Players trade in **3 specific unhatched Eggs directly** (no hatching needed) to roll 1 of 15 Lab pets. Includes a buffed Pity meter that guarantees the Top Reward upon hitting pity (Wiki Updates).
Secret Fusion Shrines (Source)	Biome 12 Waterfall & Biome 13 Banjo Bridge	**Angels & Demons Shrine:** Yellow Altar (Light) + Red Altar (Dark) works solo or with 2 players (1 pet each, both receive a Fusion Egg: *Equinox* or *Aetheron*). **Enchanted Forest Fusion Room:** Strictly requires **2 players**, and each player must contribute both *Celestial Sunlion* + *Royal Skywhale* (4 pets total) to craft *Spirit World Guardian* (Eldorado).
Wisp, Butterfly & Essence UIs (Source)	Biome 13 Sealed Tree (Press `[E]` Open)	**Grow Your Wisp:** 4 growth stages across 3 sequential quests. Inside Sealed Tree: **Convert Stand** (luck roll), **Butterfly Trade-Up Menu** (`10 Emerald → 1 Sapphire`, `10 Sapphire → 1 Amethyst`, `50 Amethyst → 1 Radiant`), and **Enchanted Altar** (crafts *Enchanted Essence* for 100% mutation application).

3. World Map Topology, 13 Linear Corridor Biomes & Event Dimensions

The core world map in *Steal An Egg* is a single straight corridor starting at the **Safe Zone & Player Bases** and extending sequentially through **13 Biomes** (Eggipedia Biomes). Each biome is separated by an entrance gate signboard displaying its recommended Speed requirement. Inside each biome, wild eggs of varying sizes spawn in nests watched over by a sleeping Biome Guardian. Nests reset every **5 minutes** (roughly every in-game night, ~4.5 minutes per Timesaver).

- **Safe Zone & 7 Player Base Plots (Eggipedia Guide):** Houses each player's upgradeable Wooden Pens, personal Treadmill station, the Sell Stand, the Trail Shop, the Base Fuse Machine, Dr. Scramble's Laboratory, Stellaris the Star Handler, the 30-minute Nitro Race portal, and the Update 9 Halloween Dimension portal. Guardians immediately leash and return to their nests once a player crosses into the Safe Zone.
- **Hidden Cave & Shrine Sub-Maps (Eggipedia Secrets):** Includes the **Abyss Ocean Left-Wall Cave** (Nibbles / Experiment #013 & the 5-part Stolen Experiment Vault), the **Angels & Demons Waterfall / Lava Wall Shrine** (dual Light/Dark fusion altars), and the **Enchanted Forest Sealed Tree** (Wisp quests, Butterfly Convert Stand, Enchanted Altar, 5-Mushroom Memory Puzzle band lounge with Jitterbug, and Cricket's Banjo bridge to the 2-player Spirit World Guardian fusion room).

- **Update 9 Halloween Dimension & Phantom Express (Timesaver):** A non-linear open map entered via the spawn portal beside the Trail Shop, divided into **Graveyard**, **Haunted Swamp** (Echo the ghost dog's 4 lost items & Ghost Fisherman), and **Abandoned Manor**, plus the 30-minute **Phantom Express** ghost train leading to the Ghost Vacuum Soul Shrine.

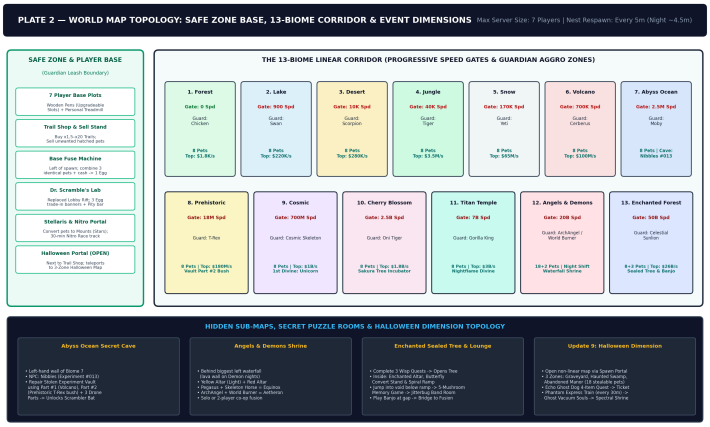

Plate 2: Top-down architectural schematic of the Safe Zone Base, the 13-Biome Linear Corridor with exact Speed gates and Guardians, hidden puzzle caves, and the Update 9 Halloween Dimension portal map.

Complete 13-Biome Corridor Progression Specification

#	Biome Name	Speed Gate	Biome Guardian	Pet Pool	Top Biome Earner ($/s)	Index Completion Weapon & Environmental Secrets
1	Forest	None (0)	Chicken	8 Pets	Brr Brr Patapim ($1.8K/s)	**Forest Bat** (x1.0 Pwr) | Starting green woodland right outside Safe Zone.
2	Lake	900	Swan	8 Pets	Leviathan ($220K/s)	**Lake Bat** (x1.1 Pwr, +1.88 Reach) | Land & aquatic nests around central water basin.
3	Desert	10,000	Scorpion	8 Pets	Royal Sphinx ($280K/s)	**Desert Bat** (x1.21 Pwr, +3.75 Reach) | Arid dunes with sandstone pyramids; first Mythics.
4	Jungle	40,000	Tiger	8 Pets	King Snake ($3.5M/s)	**Jungle Bat** (x1.33 Pwr, +5.63 Reach) | Dense tropical canopy; introduces first Secret pet.
5	Snow	170,000	Yeti	8 Pets	Ice Dragon ($65M/s)	**Snow Bat** (x1.46 Pwr, +7.5 Reach) | Glacial tundra; introduces first Eternal pet.
6	Volcano	700,000	Cerberus (Hellhound)	8 Pets	Lava Dragon ($100M/s)	**Volcano Bat** (x1.61 Pwr, +9.38 Reach) | Magma rocks; hides **Lost Vault Part #1** (Eggipedia).
7	Abyss Ocean	2,500,000	Moby	8 Pets	El Maja ($130M/s)	**Abyss Ocean Bat** (x1.77 Pwr, +11.3 Reach) | Left wall cave hides **Nibbles (#013)** & Vault.
8	Prehistoric	18,000,000	T-Rex	8 Pets	Mosasaurus ($180M/s)	**Prehistoric Bat** (x1.95 Pwr, +13.1 Reach) | Bush near T-Rex hides **Lost Vault Part #2**.

#	Biome Name	Speed Gate	Biome Guardian	Pet Pool	Top Biome Earner ($/s)	Index Completion Weapon & Environmental Secrets
9	Cosmic	700,000,000	Cosmic Skeleton (Dragon)	8 Pets	Unicorn ($1B/s)	**Cosmic Bat** (x2.14 Pwr, +15.0 Reach) | Starlit purple void; introduces first Divine pet.
10	Cherry Blossom	2,500,000,000	Oni Tiger	8 Pets	Kitsune ($1.8B/s)	**Katana** (x2.36 Pwr, +16.9 Reach) | Japanese torii gate & ancient **Sakura Incubator** tree.
11	Titan Temple	7,000,000,000	Gorilla King	8 Pets	Nightflame ($3B/s)	**Titan Axe** (x2.59 Pwr, +18.8 Reach) | South American temple; Hungry Frog parasite event.
12	Angels & Demons	20,000,000,000	ArchAngel / World Burner	18 + 2 Fusion	ArchAngel / World Burner ($5B/s) & Aetheron ($6.9B/s)	**Golden Spear** | Night-only biome rotating Light, Dark, or Merged (+Luck); **Waterfall Secret Shrine**.
13	Enchanted Forest	50,000,000,000	Celestial Sunlion (Enchanted Lion V2)	8 + 3 Quest/Fusion	Royal Skywhale ($8B/s) & Spirit World Guardian ($26B/s)	**Leafy Wooden Club** | Crystal waterfalls, **Wisp & Sealed Tree**, Mushroom Puzzle, Banjo Bridge & Duo Fusion Room.

4. 3D Models, Voxel/Mesh Proportions, Treadmills, Trails & Weapons

All 3D assets in *Steal An Egg* follow a chunky, high-readability stylized Roblox `MeshPart` aesthetic with bold silhouettes so players can identify rare spawns from a distance across a biome (Timesaver; Eggipedia Eggs). Crucially, wild eggs spawn in random shell colors that are purely decorative; **the 3D silhouette shape of the egg** (such as dorsal spikes, aquatic fins, crowns, or halo wings) exclusively determines which species is inside (Wiki Eggs).

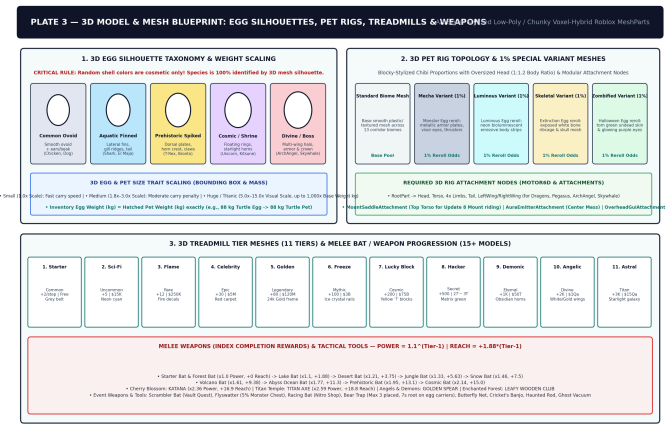

Plate 3: 3D modeling specification covering silhouette-based egg identification, weight bounding-box scaling, 1% special mesh variants, 11 treadmill models, and 15 melee weapons.

Complete 11-Tier Treadmill & 11-Tier Trail Progression Tables

Training on a Treadmill adds base Speed per step, which is multiplied by the player's equipped Trail (Wiki Treadmill; Wiki Trail; Eggipedia Guide). Trails apply their multiplier strictly while running on the treadmill and do not increase walk speed in the corridor.

Tier #	Treadmill Name (Source)	Rarity	Speed / Step	Treadmill Cost	Trail Name (Source)	Trail Rarity	Treadmill Mult.	Trail Cost
1	Treadmill (Starter Base)	Common	+2	Free	Grey Trail	Common	×1.5	$100
2	Sci-Fi Treadmill	Uncommon	+5	$15K	Green Trail	Uncommon	×2.0	$5K
3	Flame Treadmill	Rare	+12	$250K	Blue Trail	Rare	×2.5	$75K
4	Celebrity Treadmill	Epic	+30	$5M	Purple Trail	Epic	×3.0	$1.5M
5	Golden Treadmill	Legendary	+80	$120M	Golden Trail	Legendary	×3.5	$30M
6	The Freeze Treadmill	Mythic	+100	$3B	Red Trail	Mythic	×4.0	$750M
7	Lucky Block Treadmill	Cosmic	+200	$75B	Galaxy Trail	Cosmic	×5.0	$20B
8	Hacker Treadmill	Secret	+500	$2T–$3T	Secret Trail	Secret	×7.0	$500B
9	Demonic Treadmill	Eternal	+1,000	$50T	Eternal Trail	Eternal	×10.0	$12.5T
10	Angelic Treadmill	Divine	+2,000	$1Qa	Divine Trail	Divine	×14.0	$300T
11	Astral Treadmill	Titan	+3,000	$15Qa	Moonbloom Trail	Divine	×20.0	$5Qa

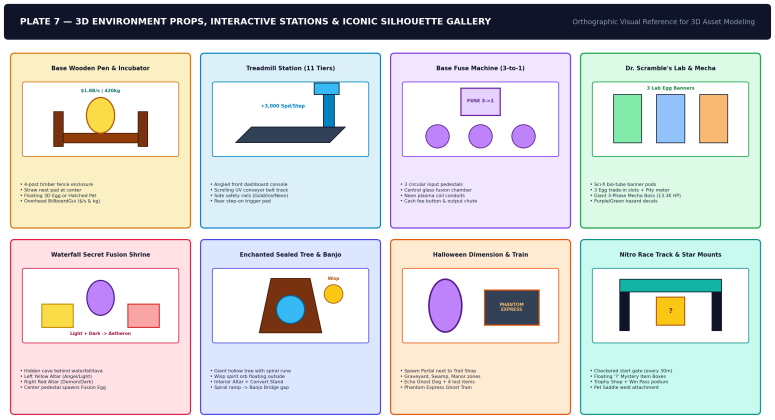

Plate 7: Orthographic visual schematics of the 8 core interactive 3D stations: Base Wooden Pens, Treadmills, Base Fuse Machine, Dr. Scramble's Lab, Waterfall Fusion Shrine, Enchanted Sealed Tree, Halloween Portal/Train, and Nitro Race Gate.

Complete Melee Bat, Index Weapon & Tactical Tool Specification

Completing a biome's Pet Index unlocks its dedicated 3D melee weapon (Eggipedia Index & Bats). Hitting another player knocks them down into a ragdoll state and forces them to drop any carried egg. Each consecutive Index weapon increases knockback force and knockdown duration by **+10%** (compounding as `1.1^(Tier-1)`) and extends hitbox reach by **+1.875 studs** per tier. (Legacy shop slaps—*Slap $500*, *Dirt Slap $2.5K*, *Golden Slap $15K*, *Diamond Slap $50K*, *Emerald Slap $200K*, and *Demon Slap $4.4M*—were removed prior to version 490.)

Weapon / Tool Name	Unlock Requirement / Source (Source)	Knockback Power	Extra Reach	Biome Index Total Speed & Cash Claim Bonus
Starter Bat	Default starter item in Hotbar Slot 1	×1.00	0	N/A (Equipped on spawn)

Weapon / Tool Name	Unlock Requirement / Source (Source)	Knockback Power	Extra Reach	Biome Index Total Speed & Cash Claim Bonus
Forest Bat	Complete Forest Index (8/8 Pets)	`×1.00`	`0`	`+5.1K Speed | $231K Cash`
Lake Bat	Complete Lake Index (8/8 Pets)	`×1.10`	`+1.88`	`+25K Speed | $22.3M Cash`
Desert Bat	Complete Desert Index (8/8 Pets)	`×1.21`	`+3.75`	`+90K Speed | $31.9M Cash`
Jungle Bat	Complete Jungle Index (8/8 Pets)	`×1.33`	`+5.63`	`+90K Speed | $356M Cash`
Snow Bat	Complete Snow Index (8/8 Pets)	`×1.46`	`+7.50`	`+160K Speed | $7.05B Cash`
Volcano Bat	Complete Volcano Index (8/8 Pets)	`×1.61`	`+9.38`	`+300K Speed | $19.3B Cash`
Abyss Ocean Bat	Complete Abyss Ocean Index (8/8 Pets)	`×1.77`	`+11.30`	`+900K Speed | $14.7B Cash`
Prehistoric Bat	Complete Prehistoric Index (8/8 Pets)	`×1.95`	`+13.10`	`+3M Speed | $24B Cash`
Cosmic Bat	Complete Cosmic Index (8/8 Pets)	`×2.14`	`+15.00`	`+12M Speed | $136B Cash`
Katana	Complete Cherry Blossom Index (8/8 Pets)	`×2.36`	`+16.90`	`+34.4M Speed | $257B Cash`
Titan Axe	Complete Titan Temple Index (8/8 Pets)	`×2.59`	`+18.80`	`+34.4M Speed | $412B Cash`
Golden Spear	Complete Angels & Demons Index (18 Pets)	Endgame Tier 12	Tier 12	`≈ +2.05B Speed | $1.47T Cash`
Leafy Wooden Club	Complete Enchanted Forest Index (8 Pets)	Endgame Tier 13	Tier 13	`$1.09T Cash` (+Speed per pet)
Scrambler Bat / Flyswatter / Racing Bat	Experiment #013 Vault Quest (5 parts) / 5% Monster Chest / Nitro Race Shop	Limited Skins	Event	Special event melee weapons (Eggipedia Secrets; Update 8).
Bear Traps (Max 3)	Equippable tactical item (Eggipedia Guide)	**7.0s Root Stun**	Ground Pad	Cannot be placed in Safe Zone; only triggers on players carrying an egg; reusable after trigger/pickup.

5. Materials, Shaders, 11 Mutations & 1% Special Model Variants

Pets and eggs in *Steal An Egg* feature two distinct visual & economic modifier layers: **Color/Aura Mutations** (which apply an income multiplier independent of weight) and **1% Special Model Variants** from limited shop eggs (Wiki Mutations; Eggipedia Mutations). When a pet carries multiple mutations (via a 50% second hatch roll or applied consumables), their bonuses stack **additively** above 100%: `Mutation Multiplier = 1 + Σ(M_i - 1)`. For example, **Golden (x2.5) + Rainbow (x3.5)** yields `1 + 1.5 + 2.5 = x5.0` (Eggipedia).

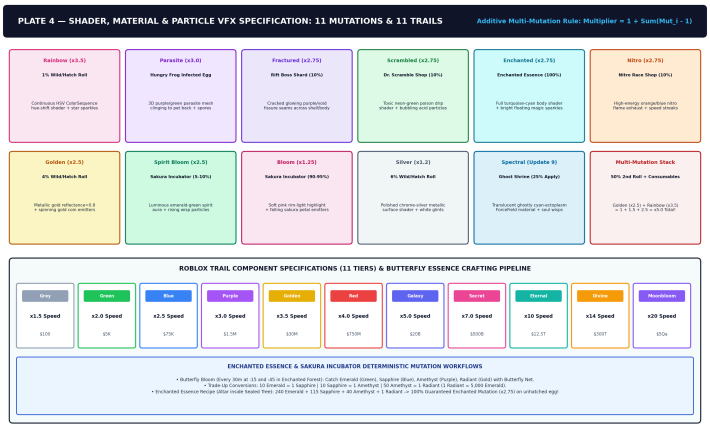

Plate 4: Complete visual shader, surface material, and `ParticleEmitter` / `Trail` specification for all 11 Mutations, multi-mutation stacking, and the 11 Trail tiers.

Mutation / Variant	Multiplier (Wiki / Eggipedia vs. Community Avg)	Roll Odds / Acquisition Pipeline	3D Surface Shader & Particle VFX Specification
Rainbow (Source)	×3.5 (Code/Wiki) / ~×2.5 (Timesaver)	**1%** random hatch roll (Weight 1/100) or Fuse Machine	Continuous HSV color-cycling shader across pet mesh + bright multi-color star/shimmer particles.
Parasite (Source)	×3.0	Dedicated Parasite / Infected Eggs during Hungry Frog Event	3D purple-green alien parasite mesh attached to pet's back with dark bio-spore particle emitter.
Fractured (Source)	×2.75	Rift Boss Shop Shard (**10% chance** on placed egg) or Boss Mastery track	Shattered purple/void glowing crack seams across the egg shell and hatched creature body.
Scrambled (Source)	×2.75	Dr. Scramble's Experiment Shop (**475 Samples**, **10% chance**)	Toxic neon-green poison surface shader with rising acid bubble and drip particles.
Enchanted (Source)	×2.75 (Measured Oct 8)	**100% guaranteed** via *Enchanted Essence* (240 Emerald, 115 Sapphire, 40 Amethyst, 1 Radiant Butterfly)	Turns the entire pet mesh bright glowing turquoise-cyan with floating magical sparkles.
Nitro (Source)	×2.75	Update 8 Nitro Race Trophy Shop Consumable (**10% chance**)	High-octane orange/cyan combustion shader with racing flame exhaust particles.
Golden (Source)	×2.5 (Code/Wiki) / ~×2.0 (Timesaver)	**4%** random hatch roll (Weight 4/100) or Fuse Machine	High-reflectance (0.8) metallic 24k gold texture with upward-bursting gold coin particles.
Spirit Bloom (Source)	×2.5 (Wiki) / ~×3.0 (Timesaver)	Cherry Blossom Sakura Incubator (**5% base**, **10% at max crystal charge**; ~2.5% community avg)	Luminous emerald-green spiritual aura with rising ethereal forest wisps.
Bloom (Sakura) (Source)	×1.25 (Wiki) / ~×1.5 (Timesaver)	Cherry Blossom Sakura Incubator (~90–97.5% standard roll)	Soft pink pastel tint with drifting cherry blossom petal particles.
Silver (Source)	×1.20 (Wiki) / ~×1.25 (Timesaver)	**6%** random hatch roll (Weight 6/100) or Fuse Machine	Polished chrome-silver metallic reflection shader with white specular glints.

Mutation / Variant	Multiplier (Wiki / Eggipedia vs. Community Avg)	Roll Odds / Acquisition Pipeline	3D Surface Shader & Particle VFX Specification
Spectral & Monstrous (Source)	Multiplier unconfirmed	**Spectral:** 500–1,000 Ghost Souls on Phantom Express (**25% chance**). **Monstrous:** ~1.5% from Hungry Frog Monster Chest	Ghostly ectoplasm cyan/purple shader (Spectral) and monstrous aura (Monstrous Egg).

6. Animations, Rigging, AI State Machines & Mathematical Economy

Recreating the game's feel requires implementing both the **R15 Character & Guardian AI State Machines** and the exact **Weight-to-Income Power Law Formulas** verified from the game files (Wiki Mutations Formula; Eggipedia Size Table).

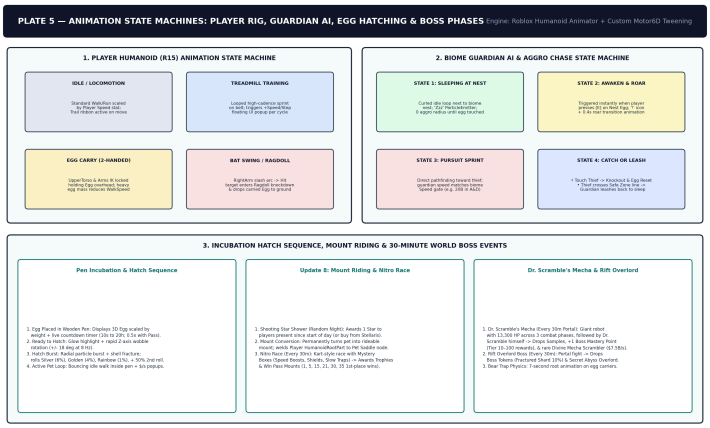

Plate 5: Animation state machines for Player locomotion/carry/combat, Biome Guardian sleep-to-pursuit AI, Pen incubation hatching, Update 8 Star Mounts, and 30-minute Boss fights.

Exact Mathematical Formulas for AI Code Implementation

- **Regime 1 — Standard Weight Scaling (Under 125× Base Weight):** Every pet species has a hidden base weight `W_0` (e.g., Frog = `3` kg, Catfish = `35` kg, Turtle = `100` kg, Unicorn = `1,200` kg per Eggipedia). When `W / W_0 ≤ 125`, the Size Multiplier is:
  `Size_Multiplier = (Actual_Weight / Base_Weight) ^ (37 / 60)`
- **Regime 2 — Diminishing Returns Scaling (Above 125× Base Weight):** Once `W / W_0 > 125`, the exponent drops from `37/60 (0.6167)` to `2/5 (0.40)` anchored continuously at `125^(13/60)` (Wiki Mutations):
  `Size_Multiplier = (Actual_Weight / Base_Weight) ^ (2 / 5) × (125 ^ (13 / 60))`
  Benchmark Checkpoints (Eggipedia): `1× = ×1.0`, `2× = ×1.53`, `5× = ×2.70`, `10× = ×4.14`, `25× = ×7.28`, `50× = ×11.2`, `100× = ×17.1`, `125× = ×19.6`, `200× = ×23.7`, `500× = ×34.2`, `1000× = ×45.1`.
- **Total Pet Income Formula:**
  `Final_Income ($/s) = Base_Income × Size_Multiplier × [1 + Σ(Mutation_i - 1)] × (2 if X2_MONEY_PASS else 1)`
- **Robux Game Passes & Free Speed Bonus (Eggipedia Game Passes; Wiki Speed):**
  - **X2 MONEY! (399 Robux):** Permanently doubles all pet income (`"Earn x2 more money!"`).
  - **X2 GROWTH SPEED! (467 Robux):** Halves all egg incubation countdowns (`"Eggs grow x2 faster!"`).
  - **Free +10,000 Speed Starter Bonus:** Awarded once for liking the game, favoriting the game, and joining the *and Collect Rare Pets* Roblox group.

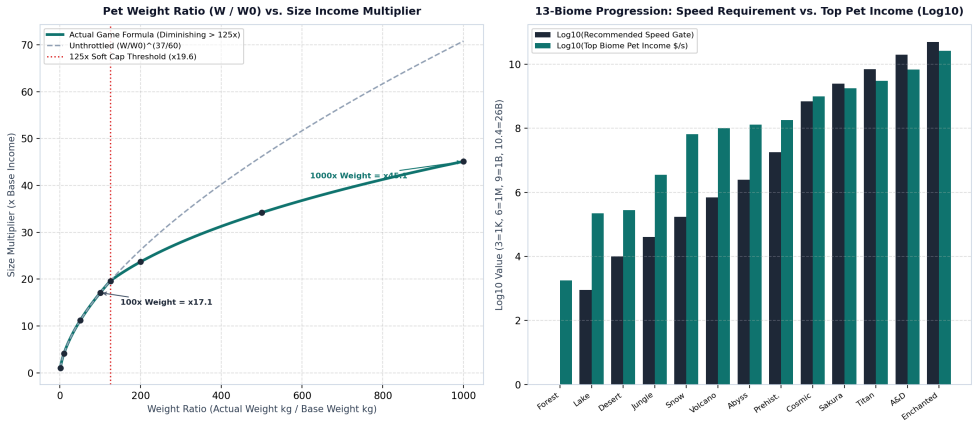

Plate 6: Mathematical plots of the two-regime Pet Weight Multiplier formula (soft cap at 125x base weight) and the log-scale alignment between Biome Speed Gates and Top Pet Incomes.

7. Complete Master Database: All 213+ Pets, Eggs, Hatch Times & Event Pools

The master tables below consolidate every documented pet and egg across all **13 World Biomes** (114 biome pets) and all **Special, Fusion, Laboratory, Rift, Mount & Update 9 Halloween Pools** (Fandom Module:Pets/Data; Eggipedia Hatch Times; Eggipedia Index & Bats; Eldorado Complete Pet Index; GameBoost Pet Database; Timesaver Update 9 Halloween Guide).

Part A: Biomes 1 to 8 (Forest through Prehistoric — Early to Mid-Game Corridor)
